

Green Policy

ACR is helping you fulfil your commitment to a 'Corporate Social Responsibility' initiative and contributing to a cleaner environment and sustainable future.

We are committed to help ease climate change by becoming a 'carbon neutral' company. This means reducing our carbon emissions as much as possible, and then offsetting the remainder. Our Green Events policy means that we consider how to reduce the carbon impact of our clients' project or event. If we are to save the planet, responsible businesses must lead by example. Now is the time for action.

It's good to feel used

Re-use and recycling are important aspects of our green policy. We have been recycling our materials since 2004, and currently over 90% of our materials are recycled with local government and private facilities. When we unpack a client's belongings, we take all the boxes and the paper to a recycling facility. We also use wooden storage containers that are made from wood from replenished forests, and can be re-used time and time again.

We've made our choices - Now you can make yours

When it comes to the worldwide end of the move we are very selective in choosing our suppliers and give preference to partners with their own environmental procedures in place, ensuring that the whole process is as environmentally friendly as possible. In addition where possible our packaging, marketing and office materials are sourced from recycled materials and from ethical companies.

To find out more about ACR International Mobility green issues please visit our website www.acrmobility.com.

On the right road

In terms of our road vehicles, they run on unleaded, our trucks run on diesel with low CO2 filters, and new vehicle purchases such as company cars and fleet cars have low emissions, all of which help us keep our impact to a minimum. We also ensure there is minimum road time for all storage requirements. Once goods are stored, they stay in one place until they are needed again.

Don't just be seen to be green

Apart from our customer's general perception of ACR International Mobility as a green company, a green policy can actually become a customer requirement. In the same way that we give preference to environmentally responsible companies, our customers are doing the same. With so much pressure to reduce the impact that business is having on the world, companies are using their buying power to force change. In this respect, we are delighted to be ahead of the game.
